# MUMS Does not Run from Desktop Shortcut

- **2501 Error (or other 2xxx errors)**
    - Trying to run more than one MUMS related program.
    - Solution: Exit all MUMS related programs and try again.
    - If still issue, then the Borland Data Base Engine needs to be changed by running BDEADMIN as described below and changing the entries in the Configuration, System, INIT →
    - After changing the entries double check that they got changed and re-boot the computer to have them take effect.

    Alternate settings for computers with small memory:
    SHAREDMEMLOCATION: 0x5BDE, SHAREDMEMSIZE: 4096

    - Running **BDEADMIN** program. This is normally found…
        In C:\BDE32 folder
        or C:\Program Files (x86)\Borland\Common Files\BDE
